

Scott Drazek

My name is Scott Drazek I'll be running for Larkspur Council. My passion for the Summer Village is what's made me choose to run for council and try keeping it the Oasis we have all become accustom too and continue to enjoy for years to come.

My Wife (Christine) and I just celebrated our 25th anniversary, we have two daughters and been part of the Summer Village for the past 19 years, owners approximately the last 17years. We've spent numerous holidays and weekends, enjoying everything the lake has to offer.

I started in the Electrical Industry as an apprentice shortly out of High School, which lead me to becoming a Lighting Specialist for a large Electrical Distributor for 9 years. I would design various lighting projects for Commercial and Government buildings and would also present to various Municipalities and Counties on lighting energy audits.

For the last 14 Years I have been working for a Global Electrical Manufacturing Company, where I have sat on 2 different councils within the company and have also been named as an inventor for some products we now manufacture globally.

One of my goals is to maintain the integrity of our Summer Village without over burdening it with development the lake can not support.

I would like to thank our current council for the job they have done over the years. I would also like to thank the other candidates running for council this term.

I look forward to your support.

Scott Drazek
